EDUCATION

B.Tech in Computer Science and Engineering — Vellore Institute of Technology (VIT), Vellore — 2026 – 2030
Relevant Coursework: Data Structures & Algorithms, OOP, Database Management Systems, Web Technologies — CGPA: 9.2 / 10.0

Senior Secondary (Class XII - CBSE) — 2024 – 2026
Core Subjects: Physics, Chemistry, Mathematics, Computer Science — Score: 90%

Secondary School (Class X - CBSE) — 2022 – 2024
All India Secondary School Examination — Score: 95%

TECHNICAL SKILLS

Languages:	**Python**, **JavaScript (ES6+)**, **C/C++**, **Java**, HTML5, CSS3/Modern Styling
Web & Frameworks:	**React.js**, **Node.js**, **Express.js**, WebGL / GLSL Shaders, RESTful API Design
Databases & Tools:	**MySQL**, **MongoDB**, Git, GitHub, VS Code, Linux Shell, Chrome DevTools
Core Competencies:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Problem Solving

FEATURED PROJECTS

ChemSentinel | *Python, Algorithmic Analysis, Hazard Intelligence* — GitHub

- Architected an intelligent hazard detection platform evaluating chemical compounds, safety compliance, and compatibility metrics.
- Engineered structured rule engines and rapid anomaly detection pipelines to provide real-time alerts for laboratory safety.
- Structured clean modular Python architecture ensuring extensibility for analytical sensors and automated telemetry.

TaskFlow – Full-Stack Task Manager | *React, Node.js, Express, MongoDB* — Live Demo — GitHub

- Built a responsive task management platform supporting Kanban/list workflows, task categorization, priority states, and persistence.
- Designed secure RESTful API endpoints with optimized database queries in MongoDB and seamless CRUD UI synchronization.
- Deployed to Vercel with high responsiveness, asynchronous state management, and intuitive user workflows.

Interactive WebGL Portfolio | *HTML5, CSS3, JavaScript, WebGL (GLSL)* — GitHub

- Engineered a custom GPU-accelerated "Mesh drift" blobs shader in WebGL1 with smooth dark/light mode palette transitions.
- Crafted responsive glassmorphic cards, custom cursor physics, and scroll-reveal interactions with zero external UI libraries.

HACKATHONS & HONORS

Code2Create Finalist
Recognized as a finalist in VIT's flagship 36-hour hackathon, designing and prototyping software under rigorous deadlines.

HackGrid Finalist
Engineered an end-to-end working MVP with focus on algorithmic problem-solving and rapid team execution.

EXTRACURRICULAR ACTIVITIES

Drumming & Rhythm Performance
Passionate drummer performing in musical ensembles; demonstrates creative focus, precision timing, and dedication.

Football
Competitive player developing agile tactical awareness, split-second decision making, and team leadership.
